

# Seminar on “Introduction to IoT and it's application in the Industry”

A virtual seminar has been organised by the Industry Institute Partnership Cell of the institute on 26th April, 2021, the topic being "Introduction to IoT and it's application in the Industry".

The speakers of the session were Mr. Sivashreet Maharara of Dadhichi Infotech and Mr. Sandeep Bhaduri of Datamaze.

Today the world is moving towards smart cities, smart healthcare etc and so there is a major paradigm shift. This new computing paradigm is powered by the cross technology platform Internet of things. This is the platform where students from CS and non CS background can work together for the betterment of the society.

We are thankful to Mr. Sivashreet Maharana and Mr. Sandeep Bhaduri for this session on this emerging topic which gave our students an insight into how the Industry is moving in this direction and thus bridging the gap that we have with industry.
